COMPANY STRATEGY

The provision of services to our customers that exceeds expectations. We will endeavour to do this by ensuring we understand our customers' requirements and processes thereby attending to the urgency and constraints of our customers. FUSION is dedicated to continuous improvement by qualifying our rubber liners and developing an unparalleled knowledge base of lining in the containment of chemicals, corrosion and abrasion, through tried and tested wear liner installation.

OUR VISION

To be our customers first choice when it comes to quality rubber lining for high wet abrasion and acid protection

MISSION STATEMENT

We focus on the ability to produce quality and quantity, by continuously improving on the way we work and adopting industry best practices.

CORE VALUES

- Safety first
- Quick, efficient and effective customer service
- Quality service and products

WHAT WE DO

Fusion supplies a premium Rubber for high abrasion.. We also supply a good quality steam and chemical cured rubbers for all lining requirements. We have the capability to apply Rubber, Ceramic and Epoxy Lining, giving customers complete corrosion and wear Solution.,

- Best pricing for quality products and services
- Respect for customers, employee and each other
- Employee development
- Skills and knowledge transfer

Where required we assist with application training and setting up lining facilities at customers premise. We also offer specialized training across Africa.

Our services provide the following protection:

- Customers chemical assets from loss
- Customers storage assets from corrosion
- Customers equipment from wear and spillage
- Customers loss of production by minimising down time
- The environment from damage

QUALITY STATEMENT

FUSION and its employees are dedicated to taking all reasonable steps to provide our customers with the highest quality product, customer service and delivery.

BUSINESS ACTIVITIES

Fusion is a diversified company with a vision offering customer's complete abrasion resistance and engineering

solutions, for the mining, petrochemical, steel and industrial sector. We are suppliers of high quality and synthetic rubber and ceramic products, marketing a wide range of cured and uncured calendared sheeting and allied products as well as alumina ceramic tiles.

To further enhance our product offering, we also supply and service a wide range of pumps, screens, gear boxes and other conveyor related equipment etc. Between the partners we have over 90 years' experience in servicing various industries i.e. mining, petrochemical, steel construction. Our company's main focus is the provision of Abrasion, Impact and Corrosion Protection solutions. i.e. rubber, ceramic and steel.

We are suppliers of high quality natural and synthetic rubber products. We also supply and install ceramic epoxy and tiles as well as training in the installation of these products.

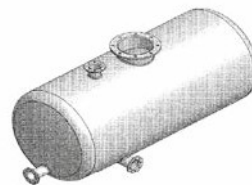

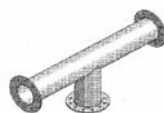

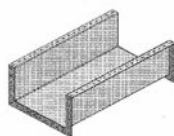

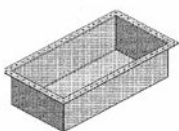

To further enhance our product offering we supply the following electrical and mechanical components i.e. Rubber hoses, adhesives, conveyor belting, Motors, Pumps, Gearboxes, screens, conveyor related products as well as tools.

RUBBER SHEETING AND LINING

Full range of imported cured sheeting made to the highest technical specification .

Equal if not better than other premium rubber. Test results from Australia on request.

- Lining of tanks, launders, chutes, cyclones, agitators, pipes, pumps, valves, pulley lagging and sumps
- Manufacture of seals, gaskets and mouldings
- Our sheeting has been manufactured specifically to handle conditions of severe abrasion and corrosion
- A full range of locally manufactured steam , chemical cured and pre-cured rubbers sheeting in hardness 40 shore to 90 shore
- Thickness 3mm to 12mm uncured - 1.5mm to 25mm cured
- Standard sheet sizes 1.2m / X 12m (Wider Sheeting on request)
- Sheets available in natural rubber, neoprene, nitrile, butyl, hypalon, EPDM, Viton and food grade rubber
- Steam and chemical cured rubber
- SABS 1198-1978 specification approved uncured compounds for rubber lining

PAST PROJECTS DONE BY THE MD

- Perseus Gold Ghana
- Grande Cote Senegal
- Moma Sands Mozambique
- Karrara Haukai Project Australia done in China
- Kansanshi Copper Mine Zambia
- Sabadala Gold Project
- North Mara expansion
- Lumwane Copper Mine Zambia
- Sishen Mine expansion South Africa
- Langerheindricht Uranium mine Namibia
- Voorspoed DeBeers Mine South Africa
- DeBeers Lining Contract, preferred supplier
- Buzwagy Gold Tanzania
- Geita Gold Mine
- Acid Plant Lining Spain
- Makuba Copper Mine Zambia

CONVEYOR BELT ACCESSORIES

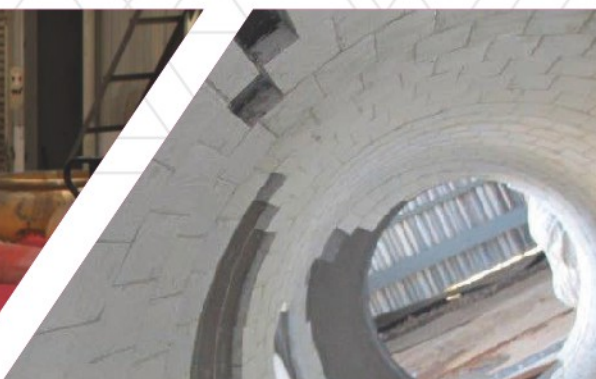

- Fusion is the top manufacturer of conveyer pulleys and supplies a comprehensive range of conveyer pulleys as well as various conveyer accessories
- General purpose wire rope, nylon, EP (polyester) and heat proof conveyer belting
- Impact beds, skirting rubber and pulley lagging (rubber and ceramic) materials
- Pulleys, idlers, scrapers, motors and gearboxes

MATERIAL HANDLING HOSE

- Suppliers of slurry handling hose - lined with Rexline Premium rubber liner for handling wet slurry.
- Range of pressure ratings with 350kpa, 700kpa and 1000kpa as standard with higher ratings on request
- Diameter 50mm - 450mm standard. Larger sizes on request
- Lengths of up to 20m

AGITATOR SHAFT LINED WITH PRE-CURED LINATEX

CERAMIC TILING

ADHESIVES

- Full range of adhesives for use in bonding rubber to rubber, rubber to metal and rubber to fabric
- Range includes CFC and chlorinated hydrocarbon free adhesives
- Primers, adhesives, cleaners and sealing compounds

MILL FURNITURE

- Suppliers of a wide range of rubber lifter bars to suite different grinding applications
- 40 Shore mill lining materials demonstrate excellent and cost effective abrasion resistance capability to improve grinding efficiency in a wide range of applications for both wet and dry processes
